**HTM2030**  
*Validation, Testing & Maintenance*

**DDC Dolphin has grown to become the UK's leading sluiceroom equipment specialist. Through our extensive focus on the manufacture, supply, installation, testing & maintenance of sluiceroom equipment, we aim to be the very best at what we do.**

Our commitment is to provide quality products and service at competitive prices. We constantly monitor every aspect of our activities in an effort to continually improve our product and service offer for the benefit of our customers.

Further details can be viewed at [www.sluce.co.uk](http://www.sluce.co.uk) or on the PASA website.

## HTM2030 Validation & Testing

DDC's extensive team of validation engineers (TPs) are:-

- Eastwood Park trained and accredited
- equipped with the latest HTM2030 testing equipment
- competent in interpreting results correctly
- experienced in completing test records and producing HTM2030 reports.

## We carry out regularly throughout the UK:-

- commissioning stage validation
- quarterly tests
- annual revalidation.

Where your estates engineers are preoccupied with emergency maintenance situations leaving little time for HTM2030 testing, why not call us?

With DDC, you can be confident that the required HTM2030 visits will be carried out on schedule. In addition, you will receive independent external certification of compliance with the relevant standard.

## Service & Mai

Over the years, we have employed several engineers are:-

## Sluiceroom audits

An efficient, modern sluiceroom is central to ensuring good hygiene and infection control standards in hospitals. In conjunction with Infection Control professionals, we have developed an audit checklist to ensure proper infection control measures are in place. Our audit takes a much broader perspective than focusing on bedpan washer disinfectors alone and gives valuable feedback to your Infection Control team. We recommend that an audit of this type is carried out at least once a year. Why not, for example, combine it with the yearly HTM2030 revalidation testing?

# SERVICE

## Maintenance

We have established a network of service engineers and qualified TPs throughout the country. Our

specialising in bedpan washer disinfectors, macerators and related sluiceroom equipment

is deployed, allowing us to monitor closely the quality of service delivered

is strategically located, to give the very best service response times

and our experienced in most major makes and models.

Due to our exclusive focus on sluicerooms, our engineers carry on board their vans stocks of spare parts that are required, minimising machine downtime.

## Breakdown & Repair Services

We offer rapid response, accurate diagnosis, quick repair. We understand fully the importance of your washer disinfectant and macerator in managing infection control.

## Preventative Maintenance

We offer a range of preventative maintenance service contracts.

Some hospitals prefer to manage emergency breakdowns themselves and call us in simply for regular preventative maintenance visits or for specialist assistance in resolving a breakdown. Other hospitals pass over to us responsibility for all aspects of service and maintenance.

Whichever model you prefer, we can tailor what we do to your own requirements. This flexible and responsive approach means that your organisation benefits from the most appropriate programme for you.

## Product Range

- Servicing, Testing & Maintenance of Sluiceroom Equipment
- Panamatic Top-Loading Washer Disinfectors
- Panamatic Front-Loading Washer Disinfectors
- Hygenex Stainless Steel Sanitaryware
- Incomatic Pad Macerators
- Disposable Bedpan Macerators
- Ancillary Sluiceroom Equipment
